Subject: Microsoft Settlement

To whom it may concern:

Please do something substantive to Microsoft. They must be stopped if we are ever to have quality, safe and secure computing again. The state of the industry and competition is deplorable and it is due mostly to Microsoft.

Your "settlement" with Microsoft is insufficient. Please do better! I suggest breaking them up and requiring source code be made available for a time. Also the government should require all the software it uses be based on open source platforms by 2005.
